# FOR EVERY DAY OF THE YEAR

In 2025, we celebrate the 30-year journey of the Wille 300 series by introducing the Wille 375 Delta Special Edition model, which boasts both a stylish appearance and comprehensive features.

The Special Edition model combines elegant matte black plastic cladding with gold details, making it pleasing to the eye, and you don't need to worry about scratches either, as the cladding is made of solid coloured plastic. In addition to an impressive appearance, the machine features **LED headlights, additional LED work lights, 8 warning lights** and a **Special Edition seat cover**.

A front loader with extensive reach, hydraulic flow sufficient for multiple work attachments and a wide range of available optional equipment ensure that you can achieve more with this one single machine than you could with a mini-tractor or a wheel loader of the same size. Ideal for both street and green space maintenance, our machine also comes with smart features to further increase its usability. The latest addition is the Wille Smart Link fleet management service, which allows you to easily monitor the status of the machine and plan work ahead.

**The five fastest customers will also get a discount on the Wille Optim 750 multi-function bucket**, your ideal helper for snow collection, loading and plowing.

**As befits the anniversary theme, there are only 30 of the impressively versatile and agile Wille 375 Delta Special Edition models available for purchase, so act quickly, contact your dealer and ask for an offer!**
